

Klinisk proces i grundstrukturens begrebsmodel

Klinisk dokumentation
baseret på klinisk metode...

Gert Galster - læge & nørd

Sundhedsstyrelsens kontor for Medicinsk Informatik

Klinisk dokumentation

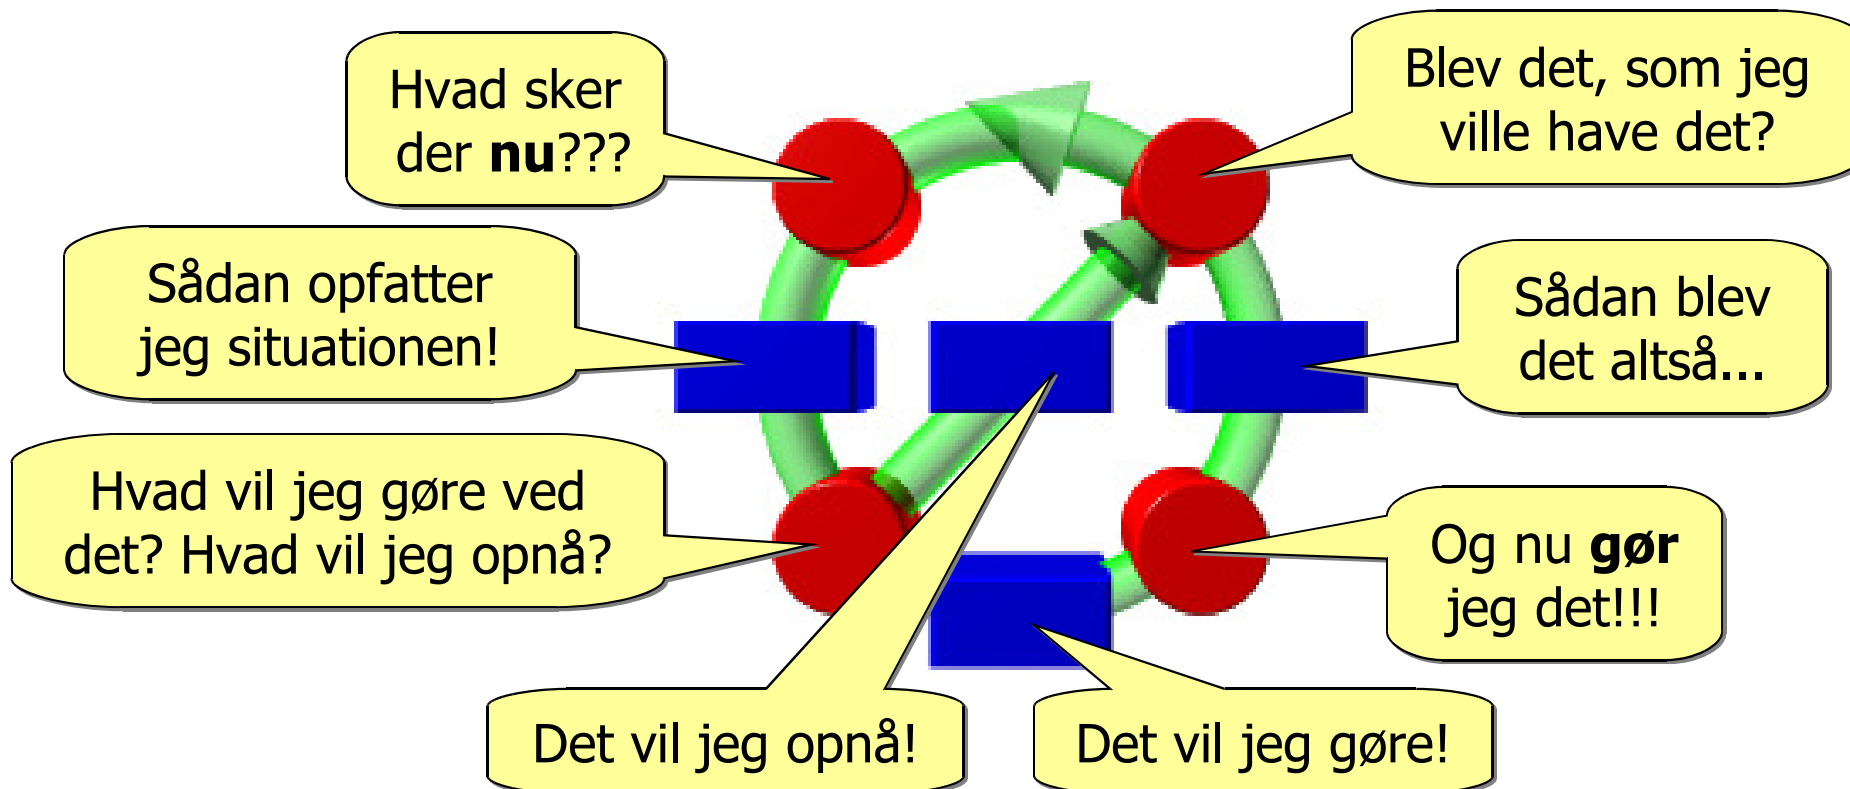

- Nødvendigheden
 - kommunikere over tid
 - kommunikere i og mellem faggrupper
 - juridisk vidnesbyrd
 - statistisk råmateriale (inkl kvalitetsvurdering)

- Udgangspunktet iht G-EPJ 1.0
 - struktureret
 - problemorienteret
 - baseret på klinisk proces

Klinisk proces

- Faglig metode for arbejde med patienter
- Samme metode
 - deles af flere kliniske faggrupper
 - under flere betegnelser
- Specialisering af noget meget generelt:

Klinisk proces - overordnet

Hvad sker der **nu**???

Sådan opfatter jeg situationen!

Diagnostisk overvejelse

Term: "Diagnose"? "P

Def: *En manifest eller sundhedsrelateret til grundlag af en faglig*

Skal altså ikke være

Skal altså ikke stå i

Resultat af handling opfattes meget bredt som:

Def: *... information om en patients tilstand i forbindelse med en udført handling*

Diagnoser

Mål

Resultat

Def: *Beskrivelse af en forventet eller ønsket værdi af en parameter formuleret i målbare termer*

Term: "Plan"?
"Ordnation"?
"Handlingsplan"?

Def: *Et program for udførelse af en bestemt type handling*

Planlægning

Udførelse

Planer

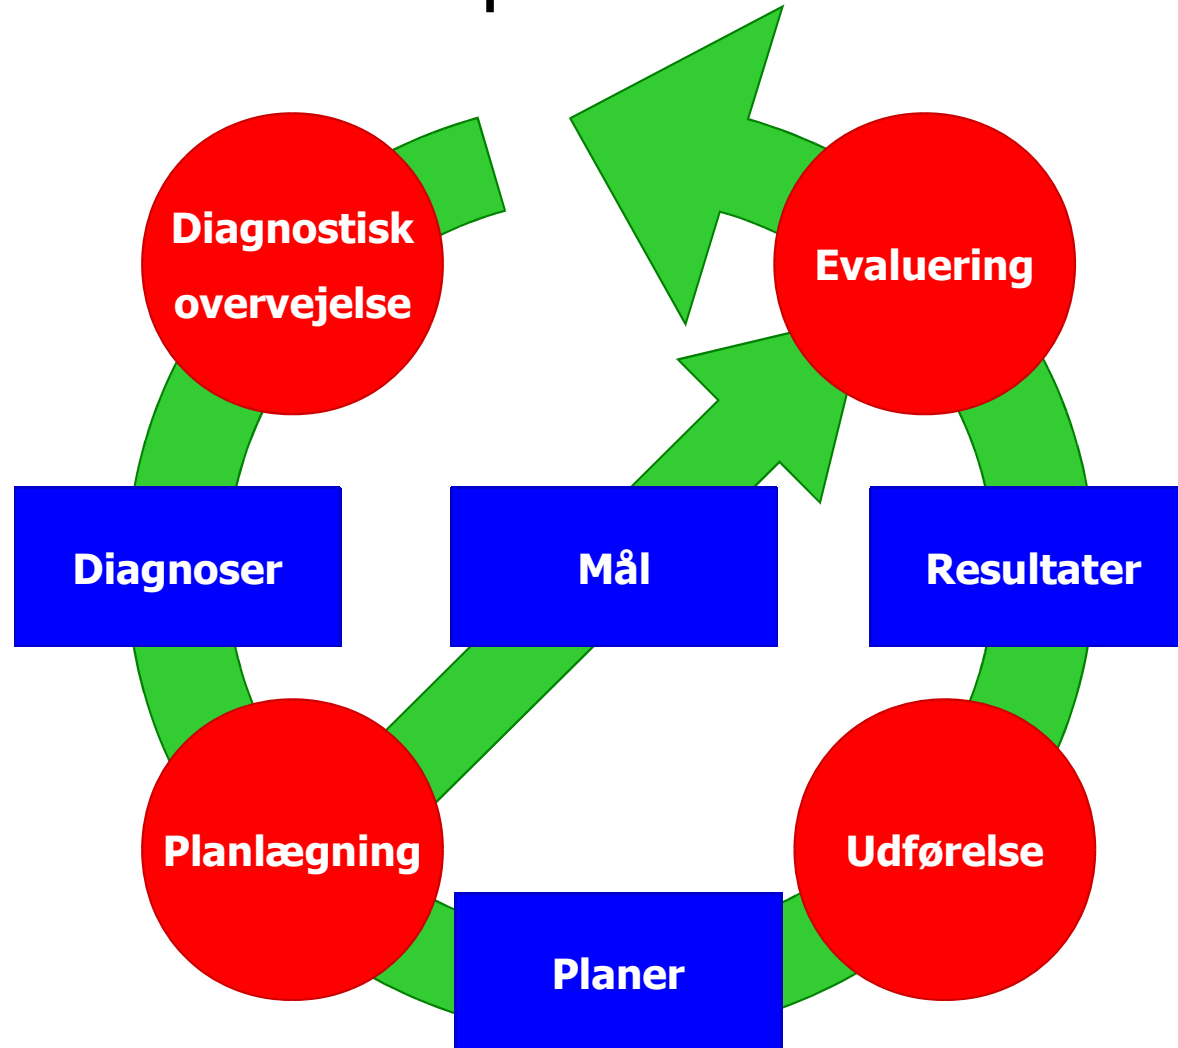

Og nu **gør** jeg det!!!

Jeg opnå!

Det vil jeg gøre!

Klinisk proces - overordnet

- Fire fundamentale proces-trin

- Fire fundamentale informationselementer

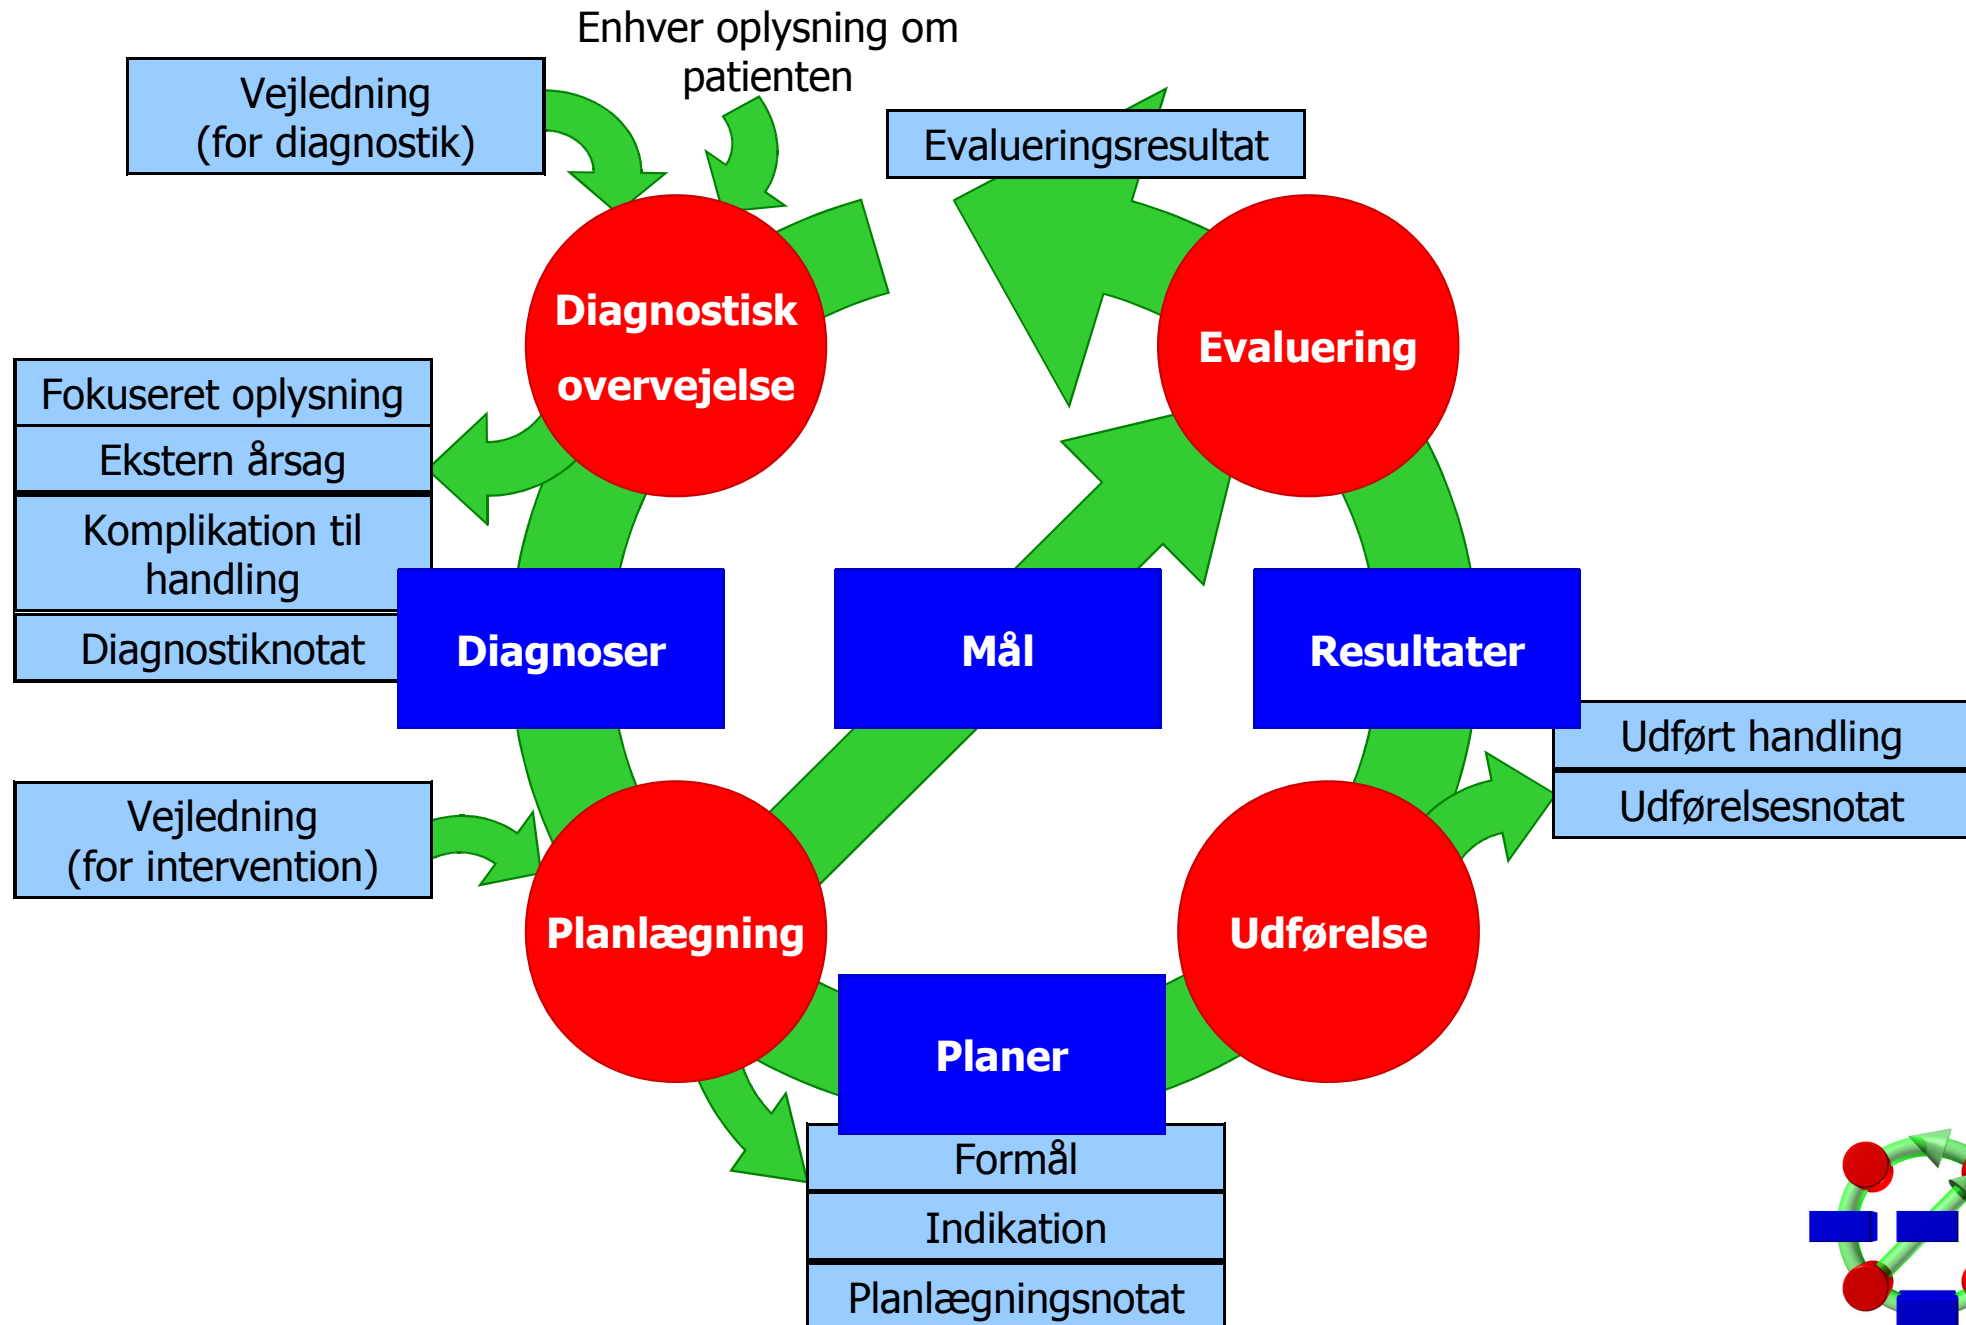

Dokumentation med klinisk proces

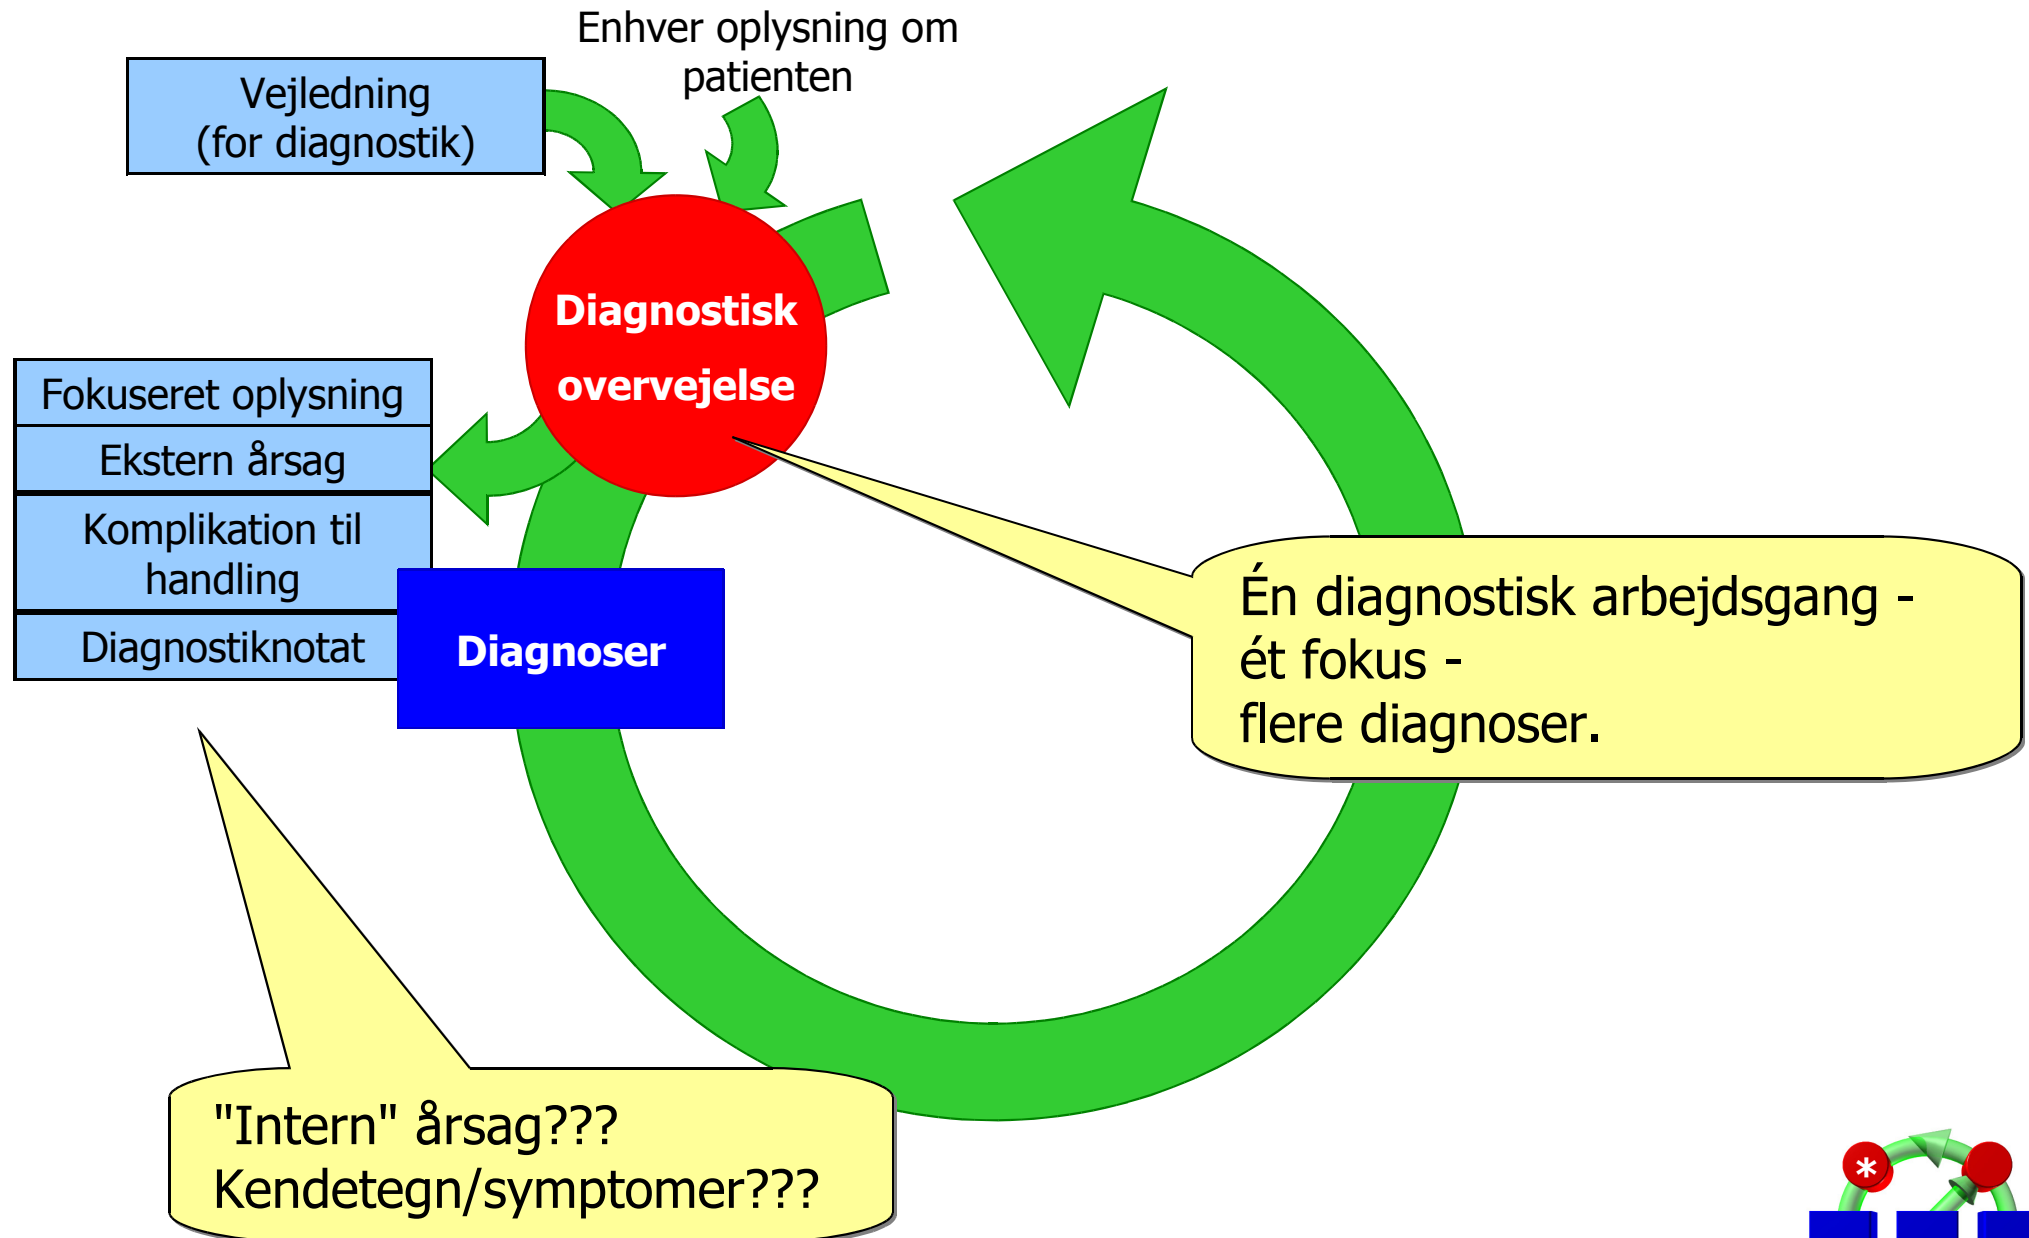

- Én begrebsmodel
 - Tværfaglig dokumentation
 - Klinisk meningsfuld struktur
 - Effektivt data-genbrug

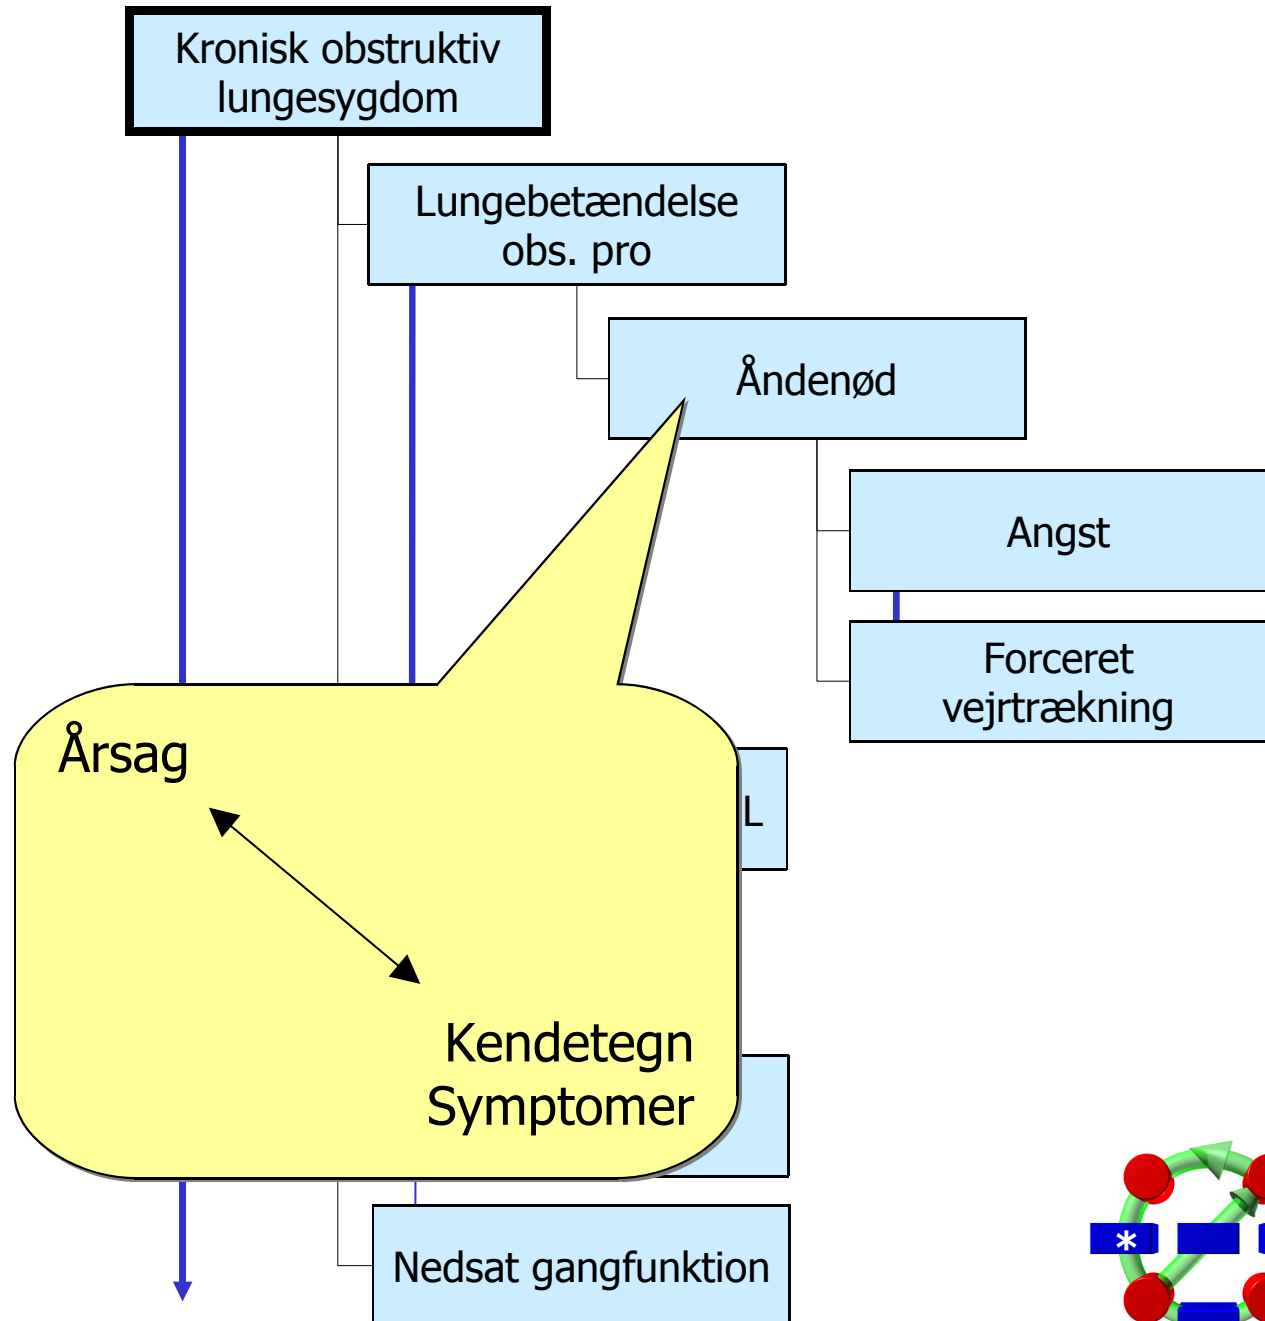

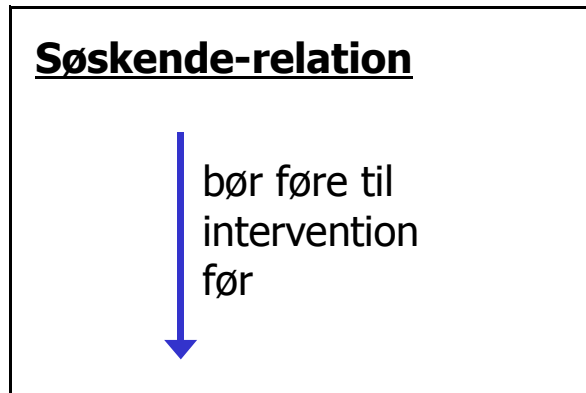

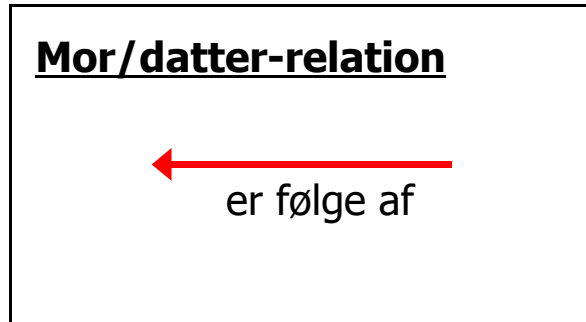

Begrebsmodellen samlet

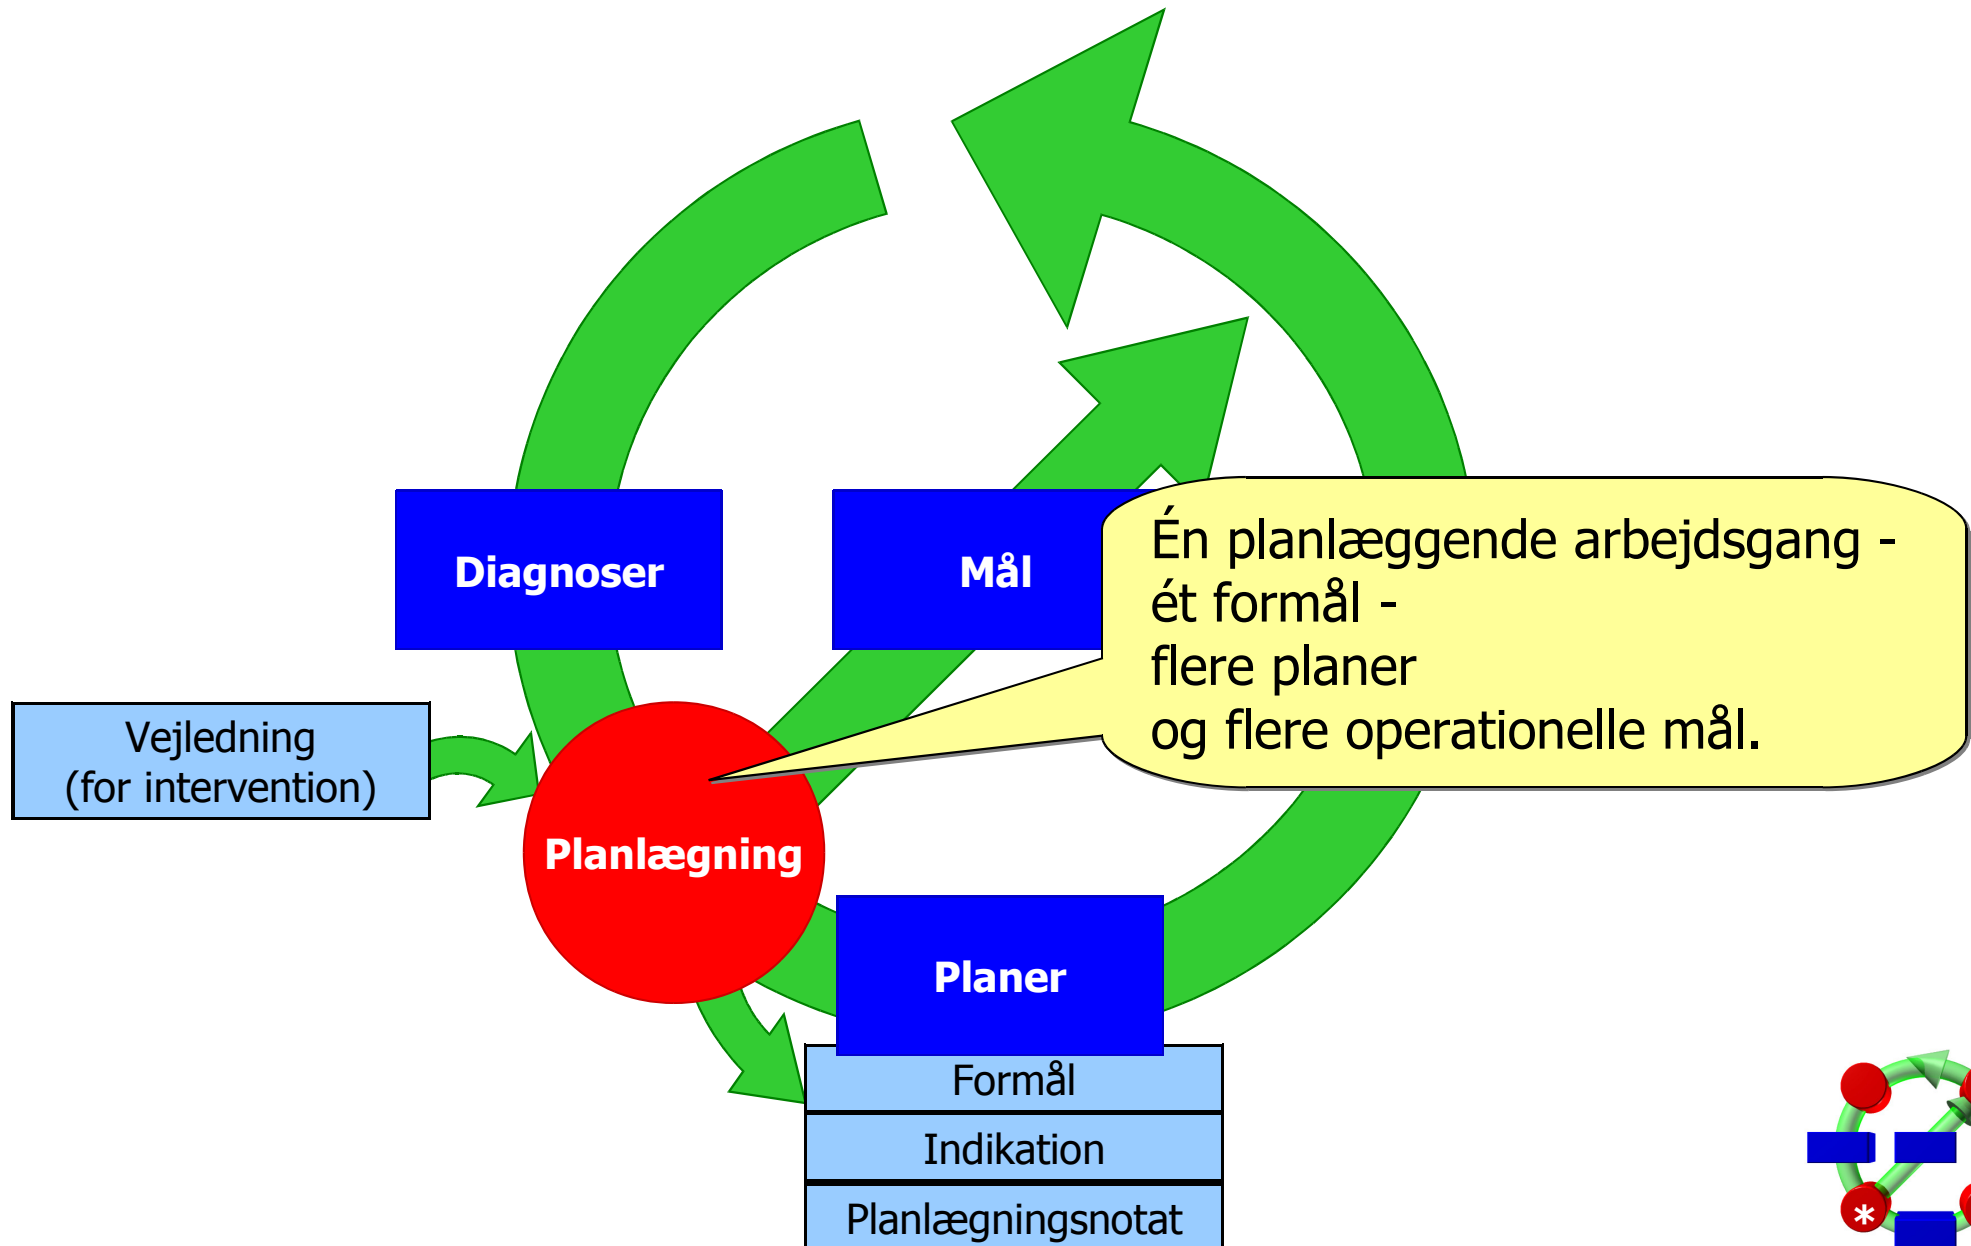

1. Diagnostisk overvejelse

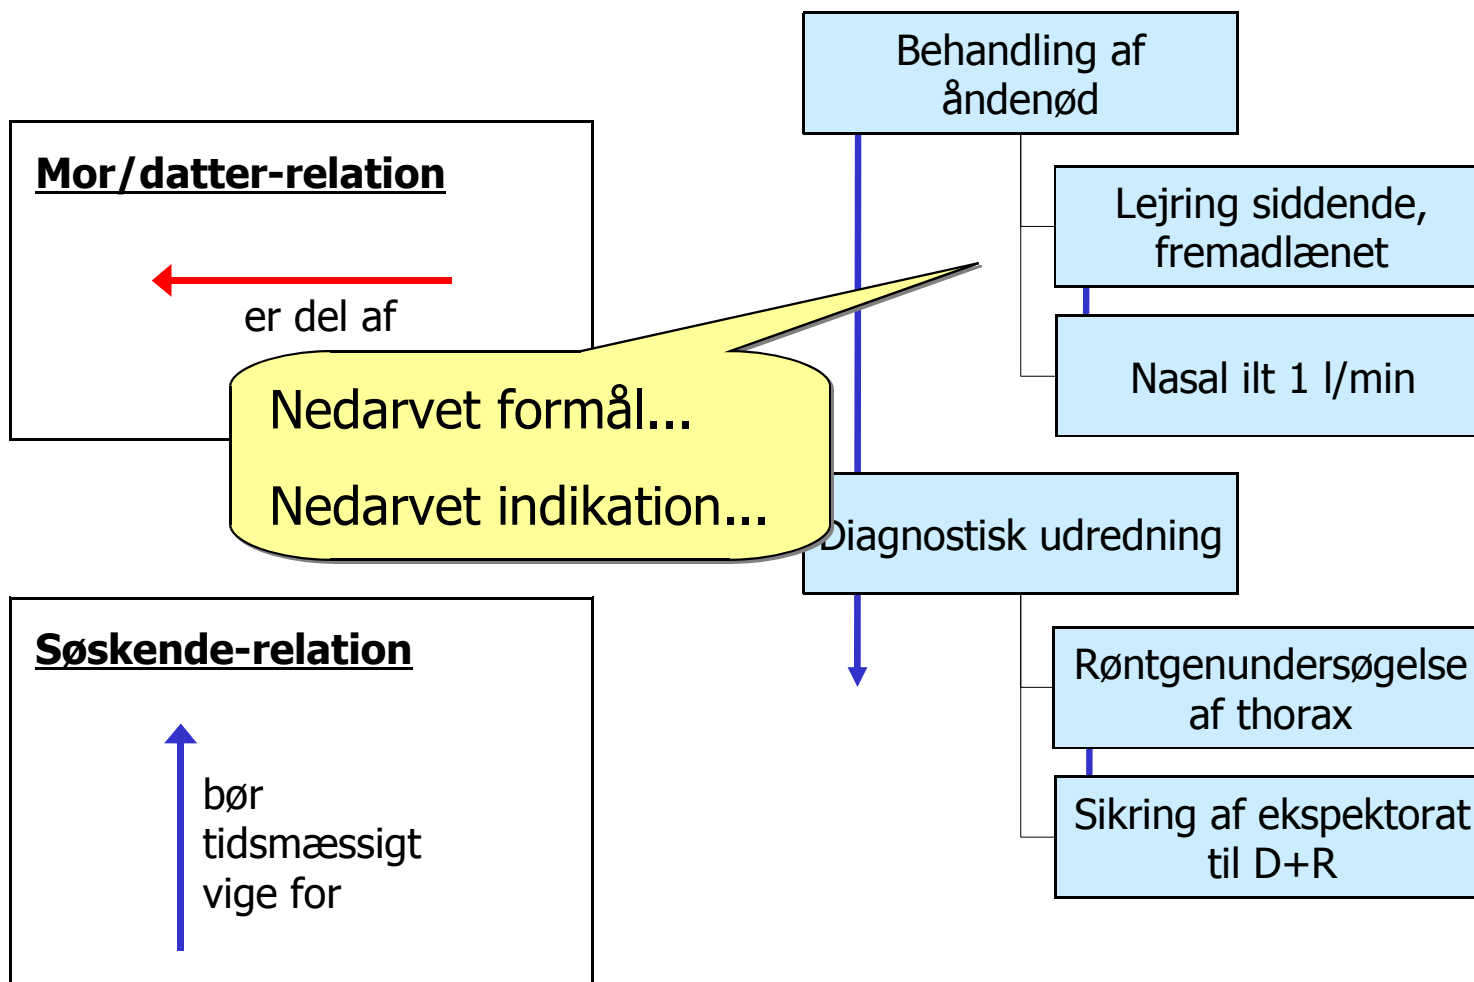

Diagnosehierarki

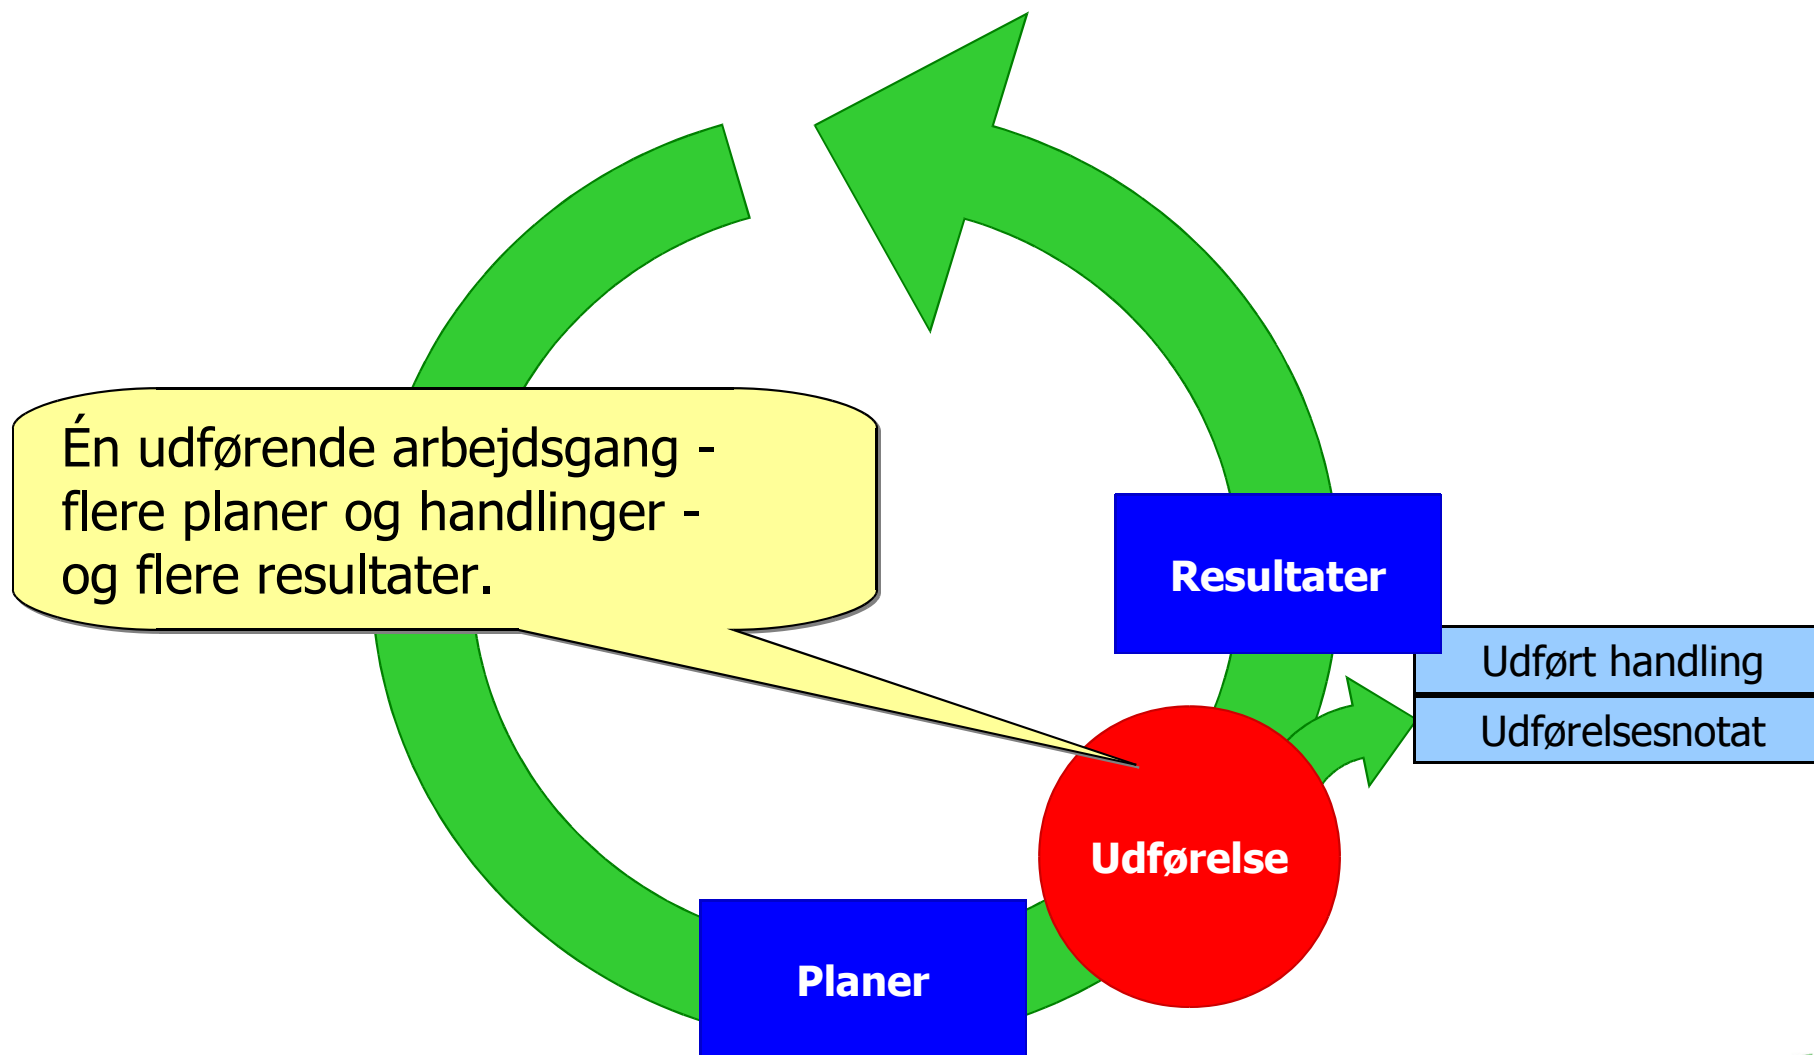

2. Planlægning

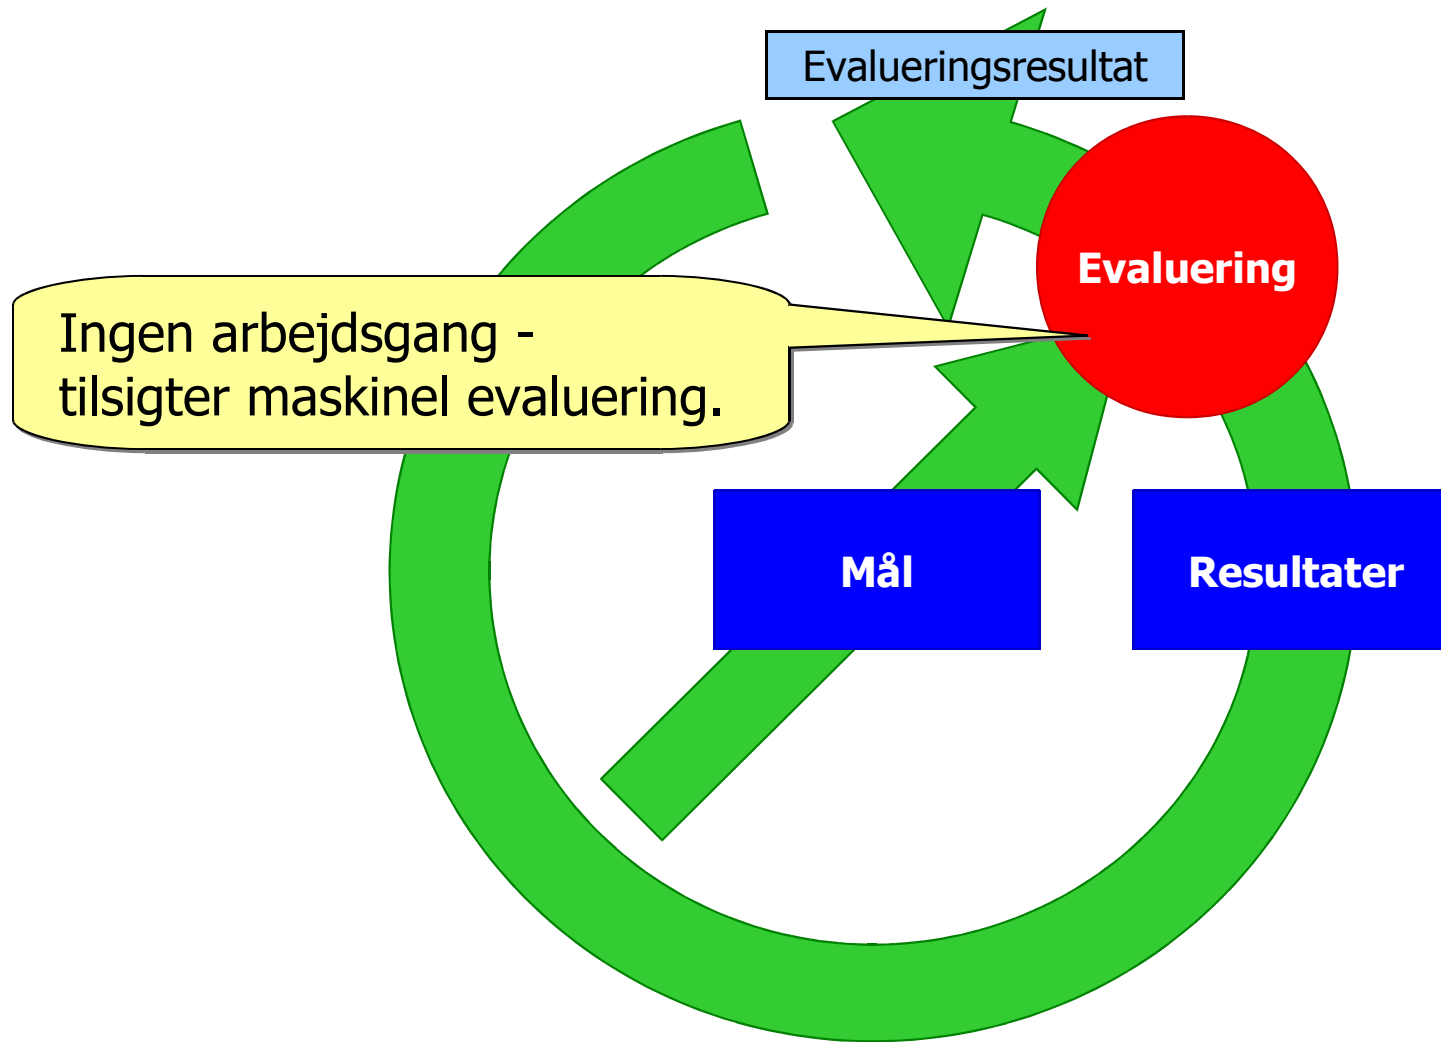

Planhierarki

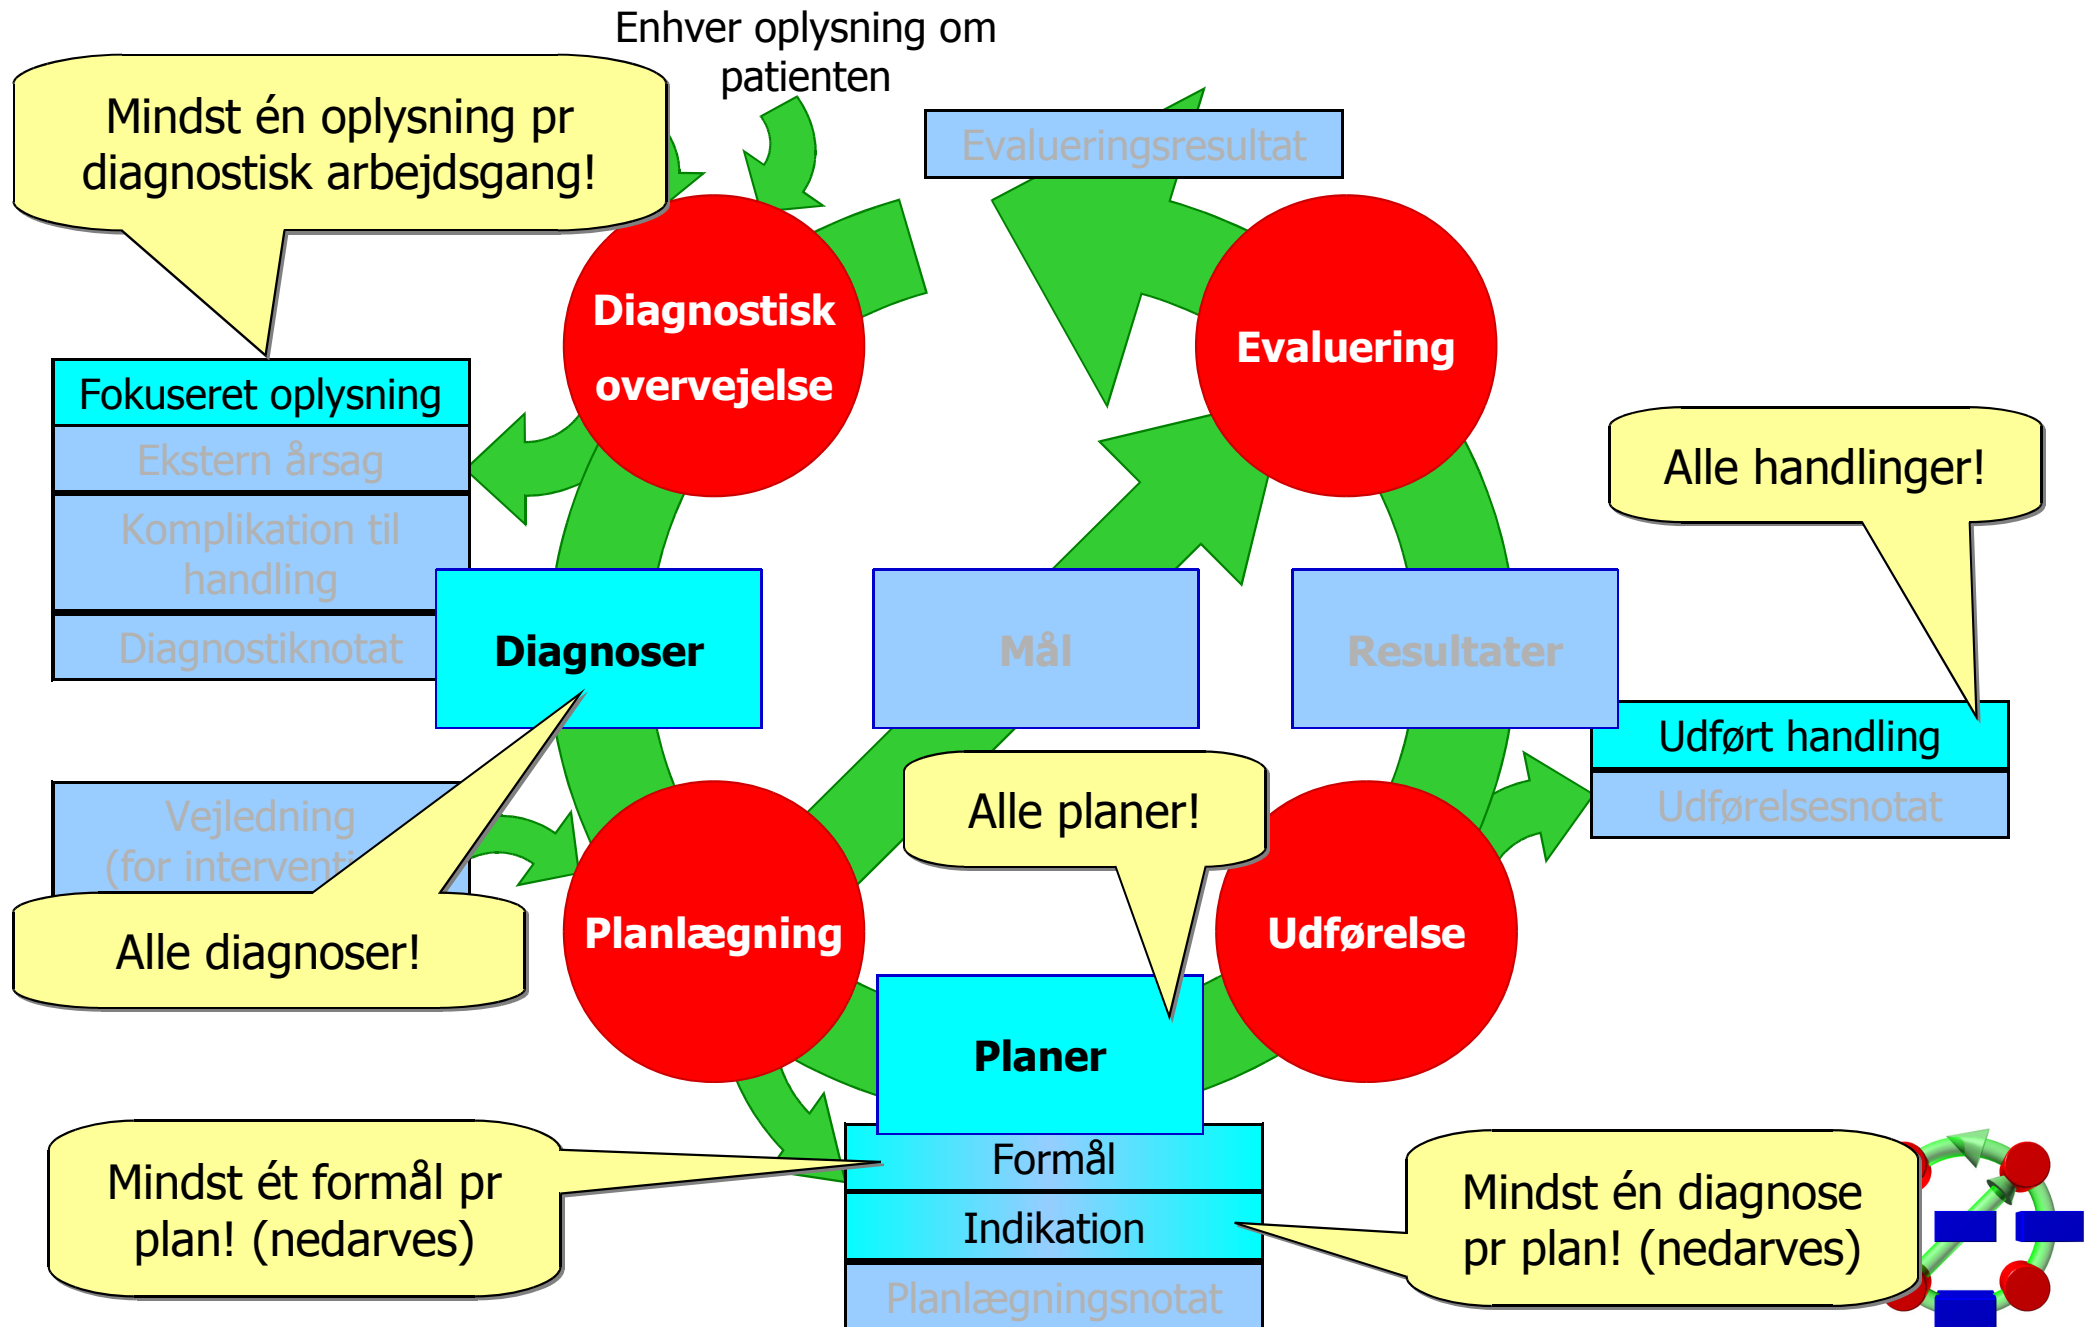

3. Udførelse

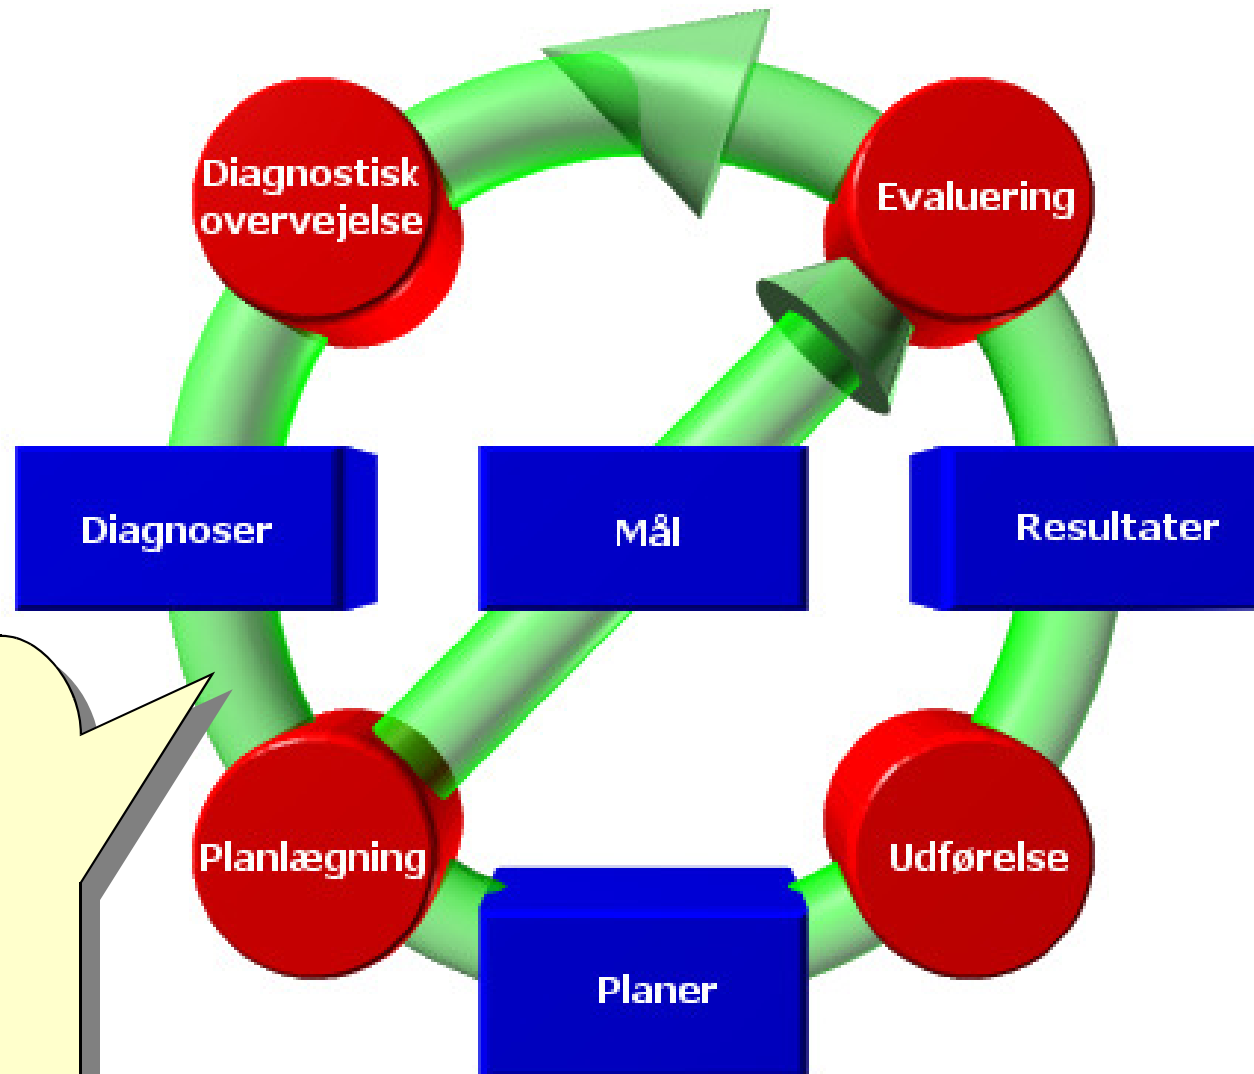

4. Evaluering

Obligatorisk dokumentation

That's all, folks!

1+ Diagnostisk overvejelse

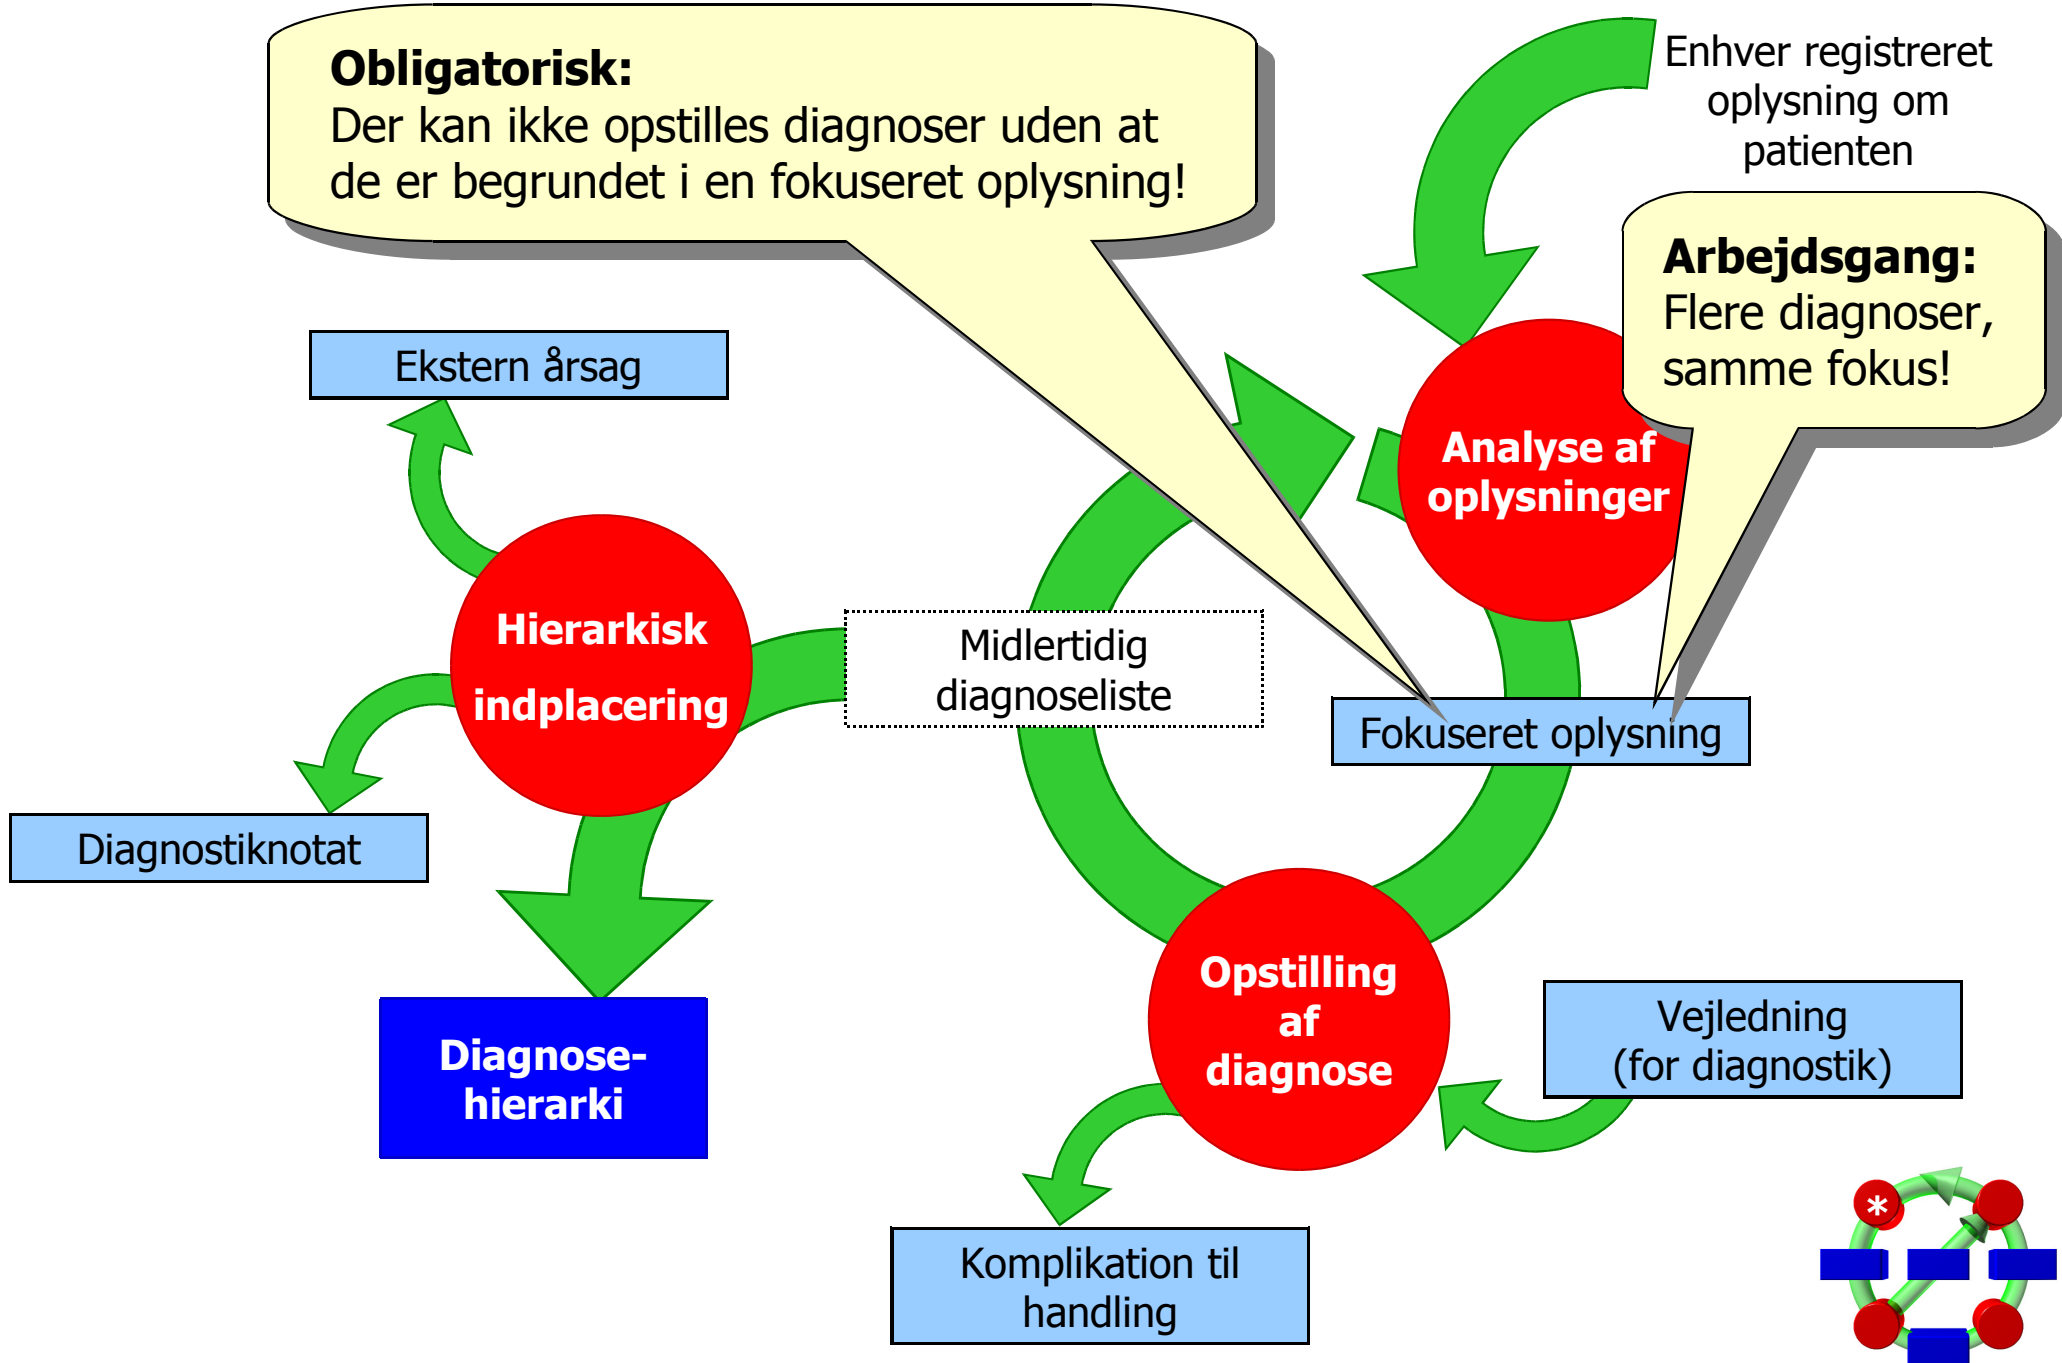

Obligatorisk:

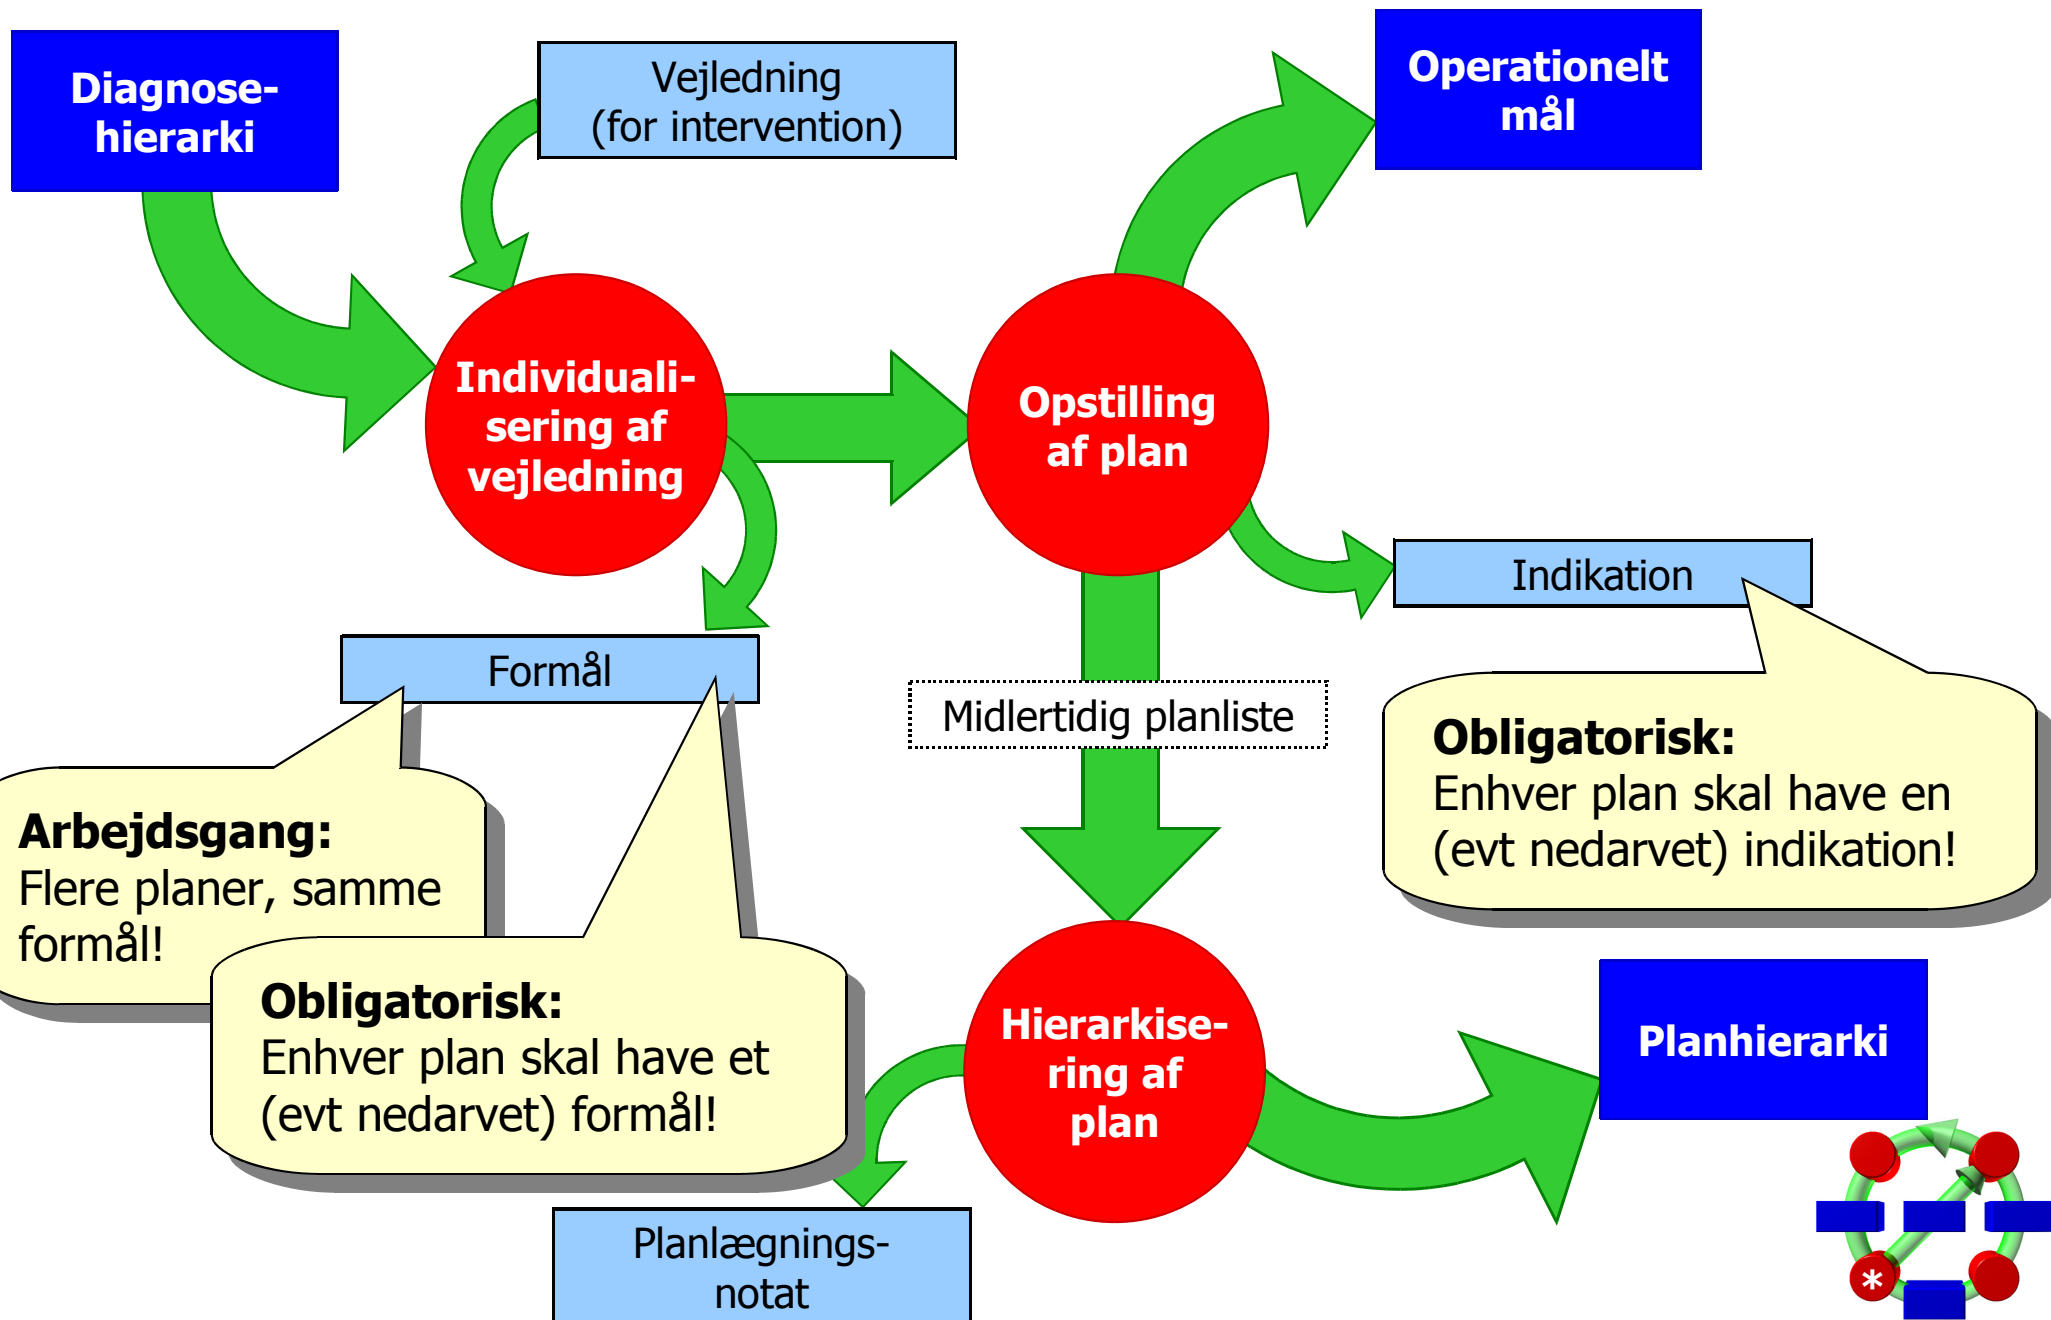

Der kan ikke opstilles diagnoser uden at de er begrundet i en fokuseret oplysning!

Enhver registreret oplysning om patienten

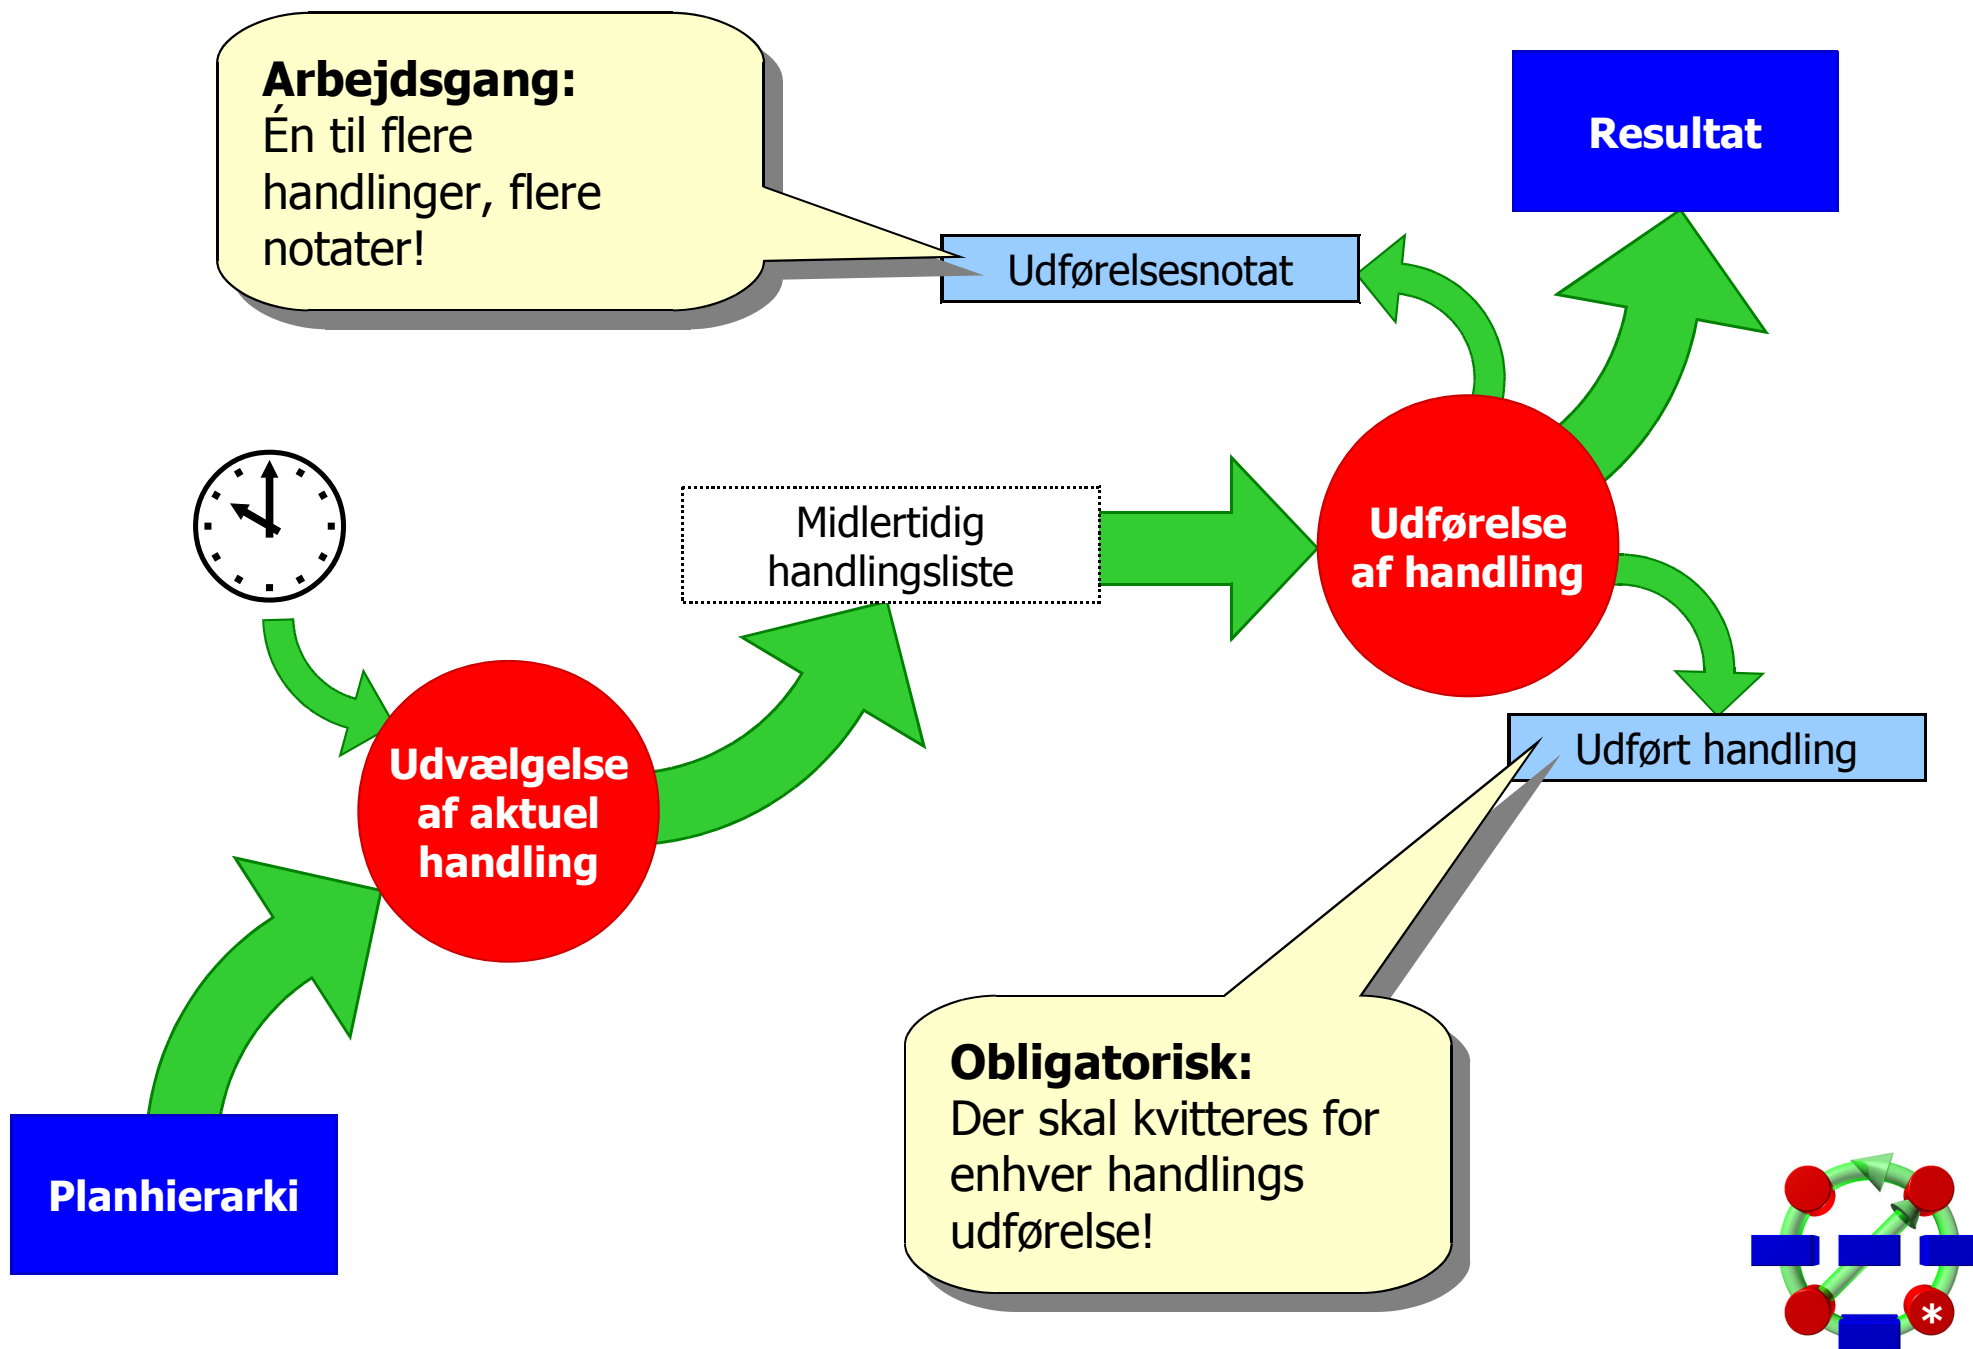

Arbejdsgang:
Flere diagnoser, samme fokus!

2+ Planlægning

3+ Udførelse

4+ Evaluering
